### **Players Attend World Anti-Doping Conference**

The Professional Players Federation attended the World Anti-Doping Conference in Madrid as part of a delegation from the European Elite Athletes Association.

During the course of the conference the players representatives met with the Chairman of the WADA Athletes Committee, Mr Vyacheslav Fetisov, to consider ways of promoting the involvement of recognised players associations within WADA.

Simon Taylor, General Secretary of the PPF, said

“WADA rightly recognises how important it is to involve athletes and players in its decision making process. The PPF in partnership with our European colleagues will be looking to work closely with WADA as it continues to refine and improve the World Anti-Doping Code.”

Ends.
